Career Accelerator Program - Full Stack Web Development - MERN

Anshul Agrawal
Full Stack Web Developer

PROFESSIONAL SUMMARY

Experienced Node.js Developer with expertise in backend development, skilled at creating high-performance, robust and reliable server-side applications and RESTful APIs. Proficient in JavaScript, Node.js, Express.js, Nest.js, MongoDB and DSA with a proven ability to learn new tech quickly. Excellent communicator and collaborator committed to seamless integration across teams. Highly Passionate, proactive and self-driven.

WORK EXPERIENCE

Schoollog, Jaipur, Rajasthan
Software Development Engineer-1
October 2024 – January 2025
Job responsibilities:

- Collaborated closely with product managers, designers, and developers to translate project requirements into functional web applications.
- Designed and developed efficient server-side APIs using Node.js and Nest.js, ensuring smooth data flow and integration with frontend applications.
- Implemented and maintained front-end components using React.js and Next.js enhancing user interface performance and engagement.
- Created optimized database models and queries with MongoDB, improving data retrieval efficiency and application speed.
- Conducted comprehensive testing and debugging, resolving issues to uphold the reliability and stability of software applications.

PROJECTS

1. Enquiry Management App | ⊕ | ⌾
JavaScript | React | Git | Node.js | MongoDB | HTML5 | CSS3 | Nest.js | Next.js | TanStack Query

- Streamlined handling of student enquiries using a MERN stack, integrating React for frontend and Node.js/Nest.js for backend.
- Designed intuitive panels for user enquiry submission and an admin dashboard for managing enquiries.
- Implemented secure admin login and enquiries table with filtering, sorting, and pagination.
- Developed detailed enquiry profiles with full student information and enquiry timelines.
- Added functionality for admins to add/edit enquiries and provide remarks with visibility settings.
