Anshul Agrawal

Full Stack Web Developer

PROFESSIONAL SUMMARY

Experienced Node.js Developer with expertise in backend development, skilled at creating high-performance, robust and reliable server-side applications and RESTful APIs. Proficient in JavaScript, Node.js, Express.js, Nest.js, MongoDB and DSA with a proven ability to learn new technologies quickly. Excellent communicator and collaborator committed to seamless integration across teams. Highly Passionate, proactive and self-driven.

WORK EXPERIENCE

Schoollog, Jaipur, Rajasthan

Software Development Engineer-1

October 2024 - January 2025

Job responsibilities:

- Collaborated effectively with designers and developers to create functional and scalable web applications, ensuring alignment with project requirements.
- Designed and developed efficient server-side APIs using Nest.js, ensuring efficient backend operations.
- Developed and maintained robust frontend components using React.js and Next.js for seamless user experiences.
- Created optimized database models and queries with MongoDB to enhance data retrieval efficiency and application speed.
- Conducted comprehensive testing and debugging procedures to resolve application issues, ensuring overall application stability and reliability.

PROJECTS

1. Enquiry Management App | ⊕ | ⦿
JavaScript | React | Git | Node.js | MongoDB | HTML5 | CSS3 | Nest.js | Next.js | TanStack Query

- Built a user-friendly full-stack application using Next.js for the front end and Nest.js for the back end.
- Designed an admin dashboard for comprehensive enquiry management and internal comments.
- Implemented secure admin login and enquiries table with filtering, sorting, and pagination.
- Developed detailed enquiry profiles with full student information and enquiry timelines.
- Added functionality for admins to edit enquiries and add/delete remarks.
